Dear Family member:

**T** **SUNAMI** So many record and report all the successful statistics and accomplishments produced from the programs that begin after the Tsunami, which I love to see and read myself. But my favorite result is seen in the faces that we together have given new hope and happiness to. It is the joy in having a family back together in a new home to begin their lives again. **Serving Our World** continues to build homes for families devastated by Tsunami.

And no one can express it better than the children who now have a loving and safe place to stay. We together rescued these children from a destructive environment where they were not being cared for. Getting involved in the lives so hurt by the recent events and to see what we did and are continuing to do, and to see that all you have to do is look at each expression.

**T** **HAILAND** Home is where the heart is, and that is why we are building the *Good Life Home and Center*, in the Northeast of Thailand, for each lonely child, each boy and girl that has no parent. It is here where their hearts will be united with the Fathers heart. Be a part of this reunion. Your gifts toward our 4 phases of construction will give these children a place to call home in a loving surrounding. A place for families to come and learn, be taught and experience His love for each other.

**E** **AST TIMOR** A great pioneer and favorite author of mine, Hudson Taylor launched out in new lands and saw amazing changes and results as he forged trails against many obstacles. Pioneering for those he didn't even know. Today in this day and age we are forging ahead to pioneer into a new

land called East Timor, which is a country just two years old. And as we continue with your help in East Timor we are seeing the results. We are helping to build clinics, provide bathroom facilities where there never has been any. We are helping to provide Christian Preschool for children in remote villages. And we are feeding the hungry children and families that are living off of the local city dump. So much more can be done with your help. When you become a part of the **Serving Our World** family you join in on these wonderful results.

Sharing the joy of children growing up in a *Good Life Home* or sharing the excitement of surviving families who are walking through the front door of their new home that you helped build. Or watching the expressions on the faces of widows and students and the many wonderful people hoping something will happen for them today.

Your gift opens the “Door of Opportunity” for you to become and enjoy being a **Serving Our World** family member! Give today and continue the adventure of serving others and sharing His love.

Each one, caring for another,

Michael Thomforde  
Founder/President
